

LUMEN

General Features

The Lumen is designed and built in Italy and features AISI 304 stainless steel. Often duplicated, Falmecc designs have been adopted by many of its competitors for decades, a complement to Falmecc designers. The Lumen is another Falmecc innovation, that strengthens their position as the industries design leader. While providing light to the cooking surface there is a beautiful ambient light transmitted up above and out from the frosted glass trim on the top of the canopy. The metallic grease filters are easily removable for washing. Also all Falmecc models come standard with backlit electronic controls and delayed shutoff.
